

AMENDMENTS TO THE CLAIMSLISTING OF THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claim 1. (Currently Amended) A semiconductor storage medium device operable to couple with an apparatus for inputting and outputting data, the device comprising:

a housing;

an imaging unit mounted on said housing;

an image processor for generating image data from a picture signal captured by said imaging unit;

a first memory for storing a plurality of pieces of said image data supplied from said image processor;

a second memory for storing control information for enabling access to said first memory; and

a controller for controlling said access to said first memory based on said control information stored in said second memory, wherein

said controller operates based on said control information stored in said second memory to store said image data and data having a format different from a format of said image ~~data~~ data, in the form of a directory structure, in said first memory, and

said controller holds said image data and said data having said format different from said format of said image stored in said first memory until said data is deleted in response to a user instruction.

Claim 2. (Previously Presented) The semiconductor storage medium device as set forth in Claim 1, wherein said housing has the shape of a card.

Claim 3. (Previously Presented) The semiconductor storage medium device as set forth in Claim 1, wherein said camera is rotatably mounted on said housing.

Claims 4-5 (Cancelled)

Claim 6. (Previously Presented) The semiconductor storage medium device as set forth in Claim 1, wherein said first memory is a random-access memory and the second memory is a read-only memory.

Claim 7. (Canceled)
